

**Declaration accepted by the Plenary Meeting of the Nobel Laureates at the PETRA
IV Meeting on 19 June 2008 and released by
the Ely Wiesel Foundation**

We, undersigned Nobel Laureates, commend the remarkable progress made in creating the SESAME Synchrotron Light Source. It will provide a major center for scientific research, with ownership shared by many nations of the Middle East. Thereby, SESAME, as well as producing educational and economic benefits, will serve as a beacon, demonstrating how shared scientific initiatives can help light the way towards peace. We urge all friends of science and peace to lend their encouragement and support to this exemplary project.
