

SESAME

Synchrotron-light for Experimental Science and Applications in the Middle East

Mandatory Safety Instructions for Business Visits

COVID-19

Read, understand, ask before complete filling online visit form and fully comply with.

SESAME has the write to stop your visit if you violate or break any of these instructions:

- 1- Aman application downloaded and active on your mobile, (**security on the main gate will make sure of it**).
- 2- If Aman application showed **High or Extreme high risk**, in this case, you will not be able to enter SESAME unless 14 days at least elapsed from the date of exposure date, so, take care and be careful, (**security on the main gate will make sure of that as well**).
- 3- Do you suffer from fever, cough and/ or difficulty in breathing? Surveillance staff at the main gate will check the temperature of anybody entering the premises.
- 4- YOU MUST bring at least one KN95 and must not be shared with others under any circumstances,
- 5- Mask is compulsory in all common areas; minimum safety distance of **2 m** should be kept at all times.
- 6- Respect sneezing or coughing guidelines:
 - a. **Before:** Mask + Hands on your face+ Face down and away from others or surfaces.
 - b. Sneeze or cough,
 - c. **After:** Clean your hands directly.
- 7- No more than **two** people in one big room, if this will not be the case, a prior approval from safety officer is required. Working in open areas is limited by safe physical distancing.
- 8- Don't touch your face and if you are obliged to do so, you should clean in advance your hands appropriately.
- 9- Do not share with others any type of cigarettes, food or beverage and clean other shared tools.
- 10-Upon certain circumstances, you might subject to new instructions on your arrival and such instructions will not affect your plan at all.
- 11-You should work under the full supervision of the staff member in charge and the safety officer will make sure of your compliance with the above mentioned instructions.
